

Cosmetic Clinic Coolangatta

Cosmetic Laser & Injectables Clinic Coolangatta welcomes you.

As leading Australian Laser & Skin Clinic Specialists, we are Qld Radiation & Health Accredited. Treatments performed under Dr's supervision

INJECTABLES

V2 Beauty Booster

V2 Skin Beauty Booster is a unique skin enhance which prevents premature skin aging, restores skin density and maintains skin glow. It is a natural, highly non-cross-linked dermal filler that improves skin hydration, firmness and viscoelastic properties of the skin. This unique dermal filler is compiled of antioxidants, minerals and amino acids all of which are naturally present in our skin.

Dermal Filler

Dermal fillers are an injectable gel that adds volume to your skin and lips with natural looking results. You can expect to receive instant, natural looking and long lasting results with fillers. Fillers are made from a natural complex sugar, which is naturally occurring in our body. The complex sugar assists skin hydration by attracting and holding water. It also combines with collagen and elastin to help provide skin structure and elasticity.

LASER

ACNE

Acne is a multifactorial condition of the pilosebaceous units. Commonly seen in teenagers and normally presents with sore, inflamed pustules, closed comedones and scarring of the dermal tissue. Hormonal acne is commonly seen on individuals in their 20's and 30's. Researchers have found a relationship between stress and acne flare-ups. In response to stress, our bodies produce more of the hormone androgen, this stimulates an increased activity of oil glands and hair follicles in the skin, therefore leading to acne.

Laser Genesis

Laser Genesis skin therapy is an innovative, technologically advanced way to promote vibrant and healthy skin in men and women.

The Laser Genesis procedure utilises non-invasive laser technology to discretely and efficiently treat fine line wrinkles, large pores, uneven skin texture, diffuse redness and scars.

DERMAL

OMNILUX

Light emitting diode (LED) medical light based therapy. Unlike any other light therapy device on the market, OMNILUX is based on many years of medical research. OMNILUX is used extensively by ~3000 dermatologists and plastic surgeons worldwide.

OMNILUX efficacy claims for improvement in appearance of wrinkles and acne treatments are substantiated by over a decade of clinical evidence.

MICRODERMABRASION

Microdermabrasion is a non-invasive superficial cosmetic procedure that uses a disposable abrasive head for controlled exfoliation to carefully remove the outermost layer of dead skin cells from the epidermis. By encouraging cell turnover to be more regulated, your skin will increase in strength and improve in texture and tone.

Non Surgical

ResurFX

ResurFX is the most advanced technology in laser skin resurfacing. ResurFX is a non-ablative fractional resurfacing laser. It stimulates the production of new collagen and elastin fibers in the deep layers of the skin. This procedure can reduce photo damaged skin & scar tissue on the face, neck, chest, hands, among other areas on the body. This procedure reveals a younger, more refined skin and dramatically reduces the appearance of wrinkles, scarring and age spots.

About Us

Dr Sanjay Mohindra and his team provide a wide range of cosmetic procedures.
